**5. SPILL RESPONSE AND NOTIFICATION PROCEDURES**

**A. REPORT THE SPILL.**

The first action in the event of a spill is to report the spill. If you observe a release of a hazardous material, report it to your supervisor and the Fire Department as required below. If the spill is in a Training Area, then the spill will be reported to Range Control, who will then notify the Fire Department. The Fire Department will notify Environmental Division and, if required, Installation Safety, Emergency Medical, and Preventative Medicine. The Environmental Division does all reporting to State/Federal Agencies.

*The Fire Department (or Range Control) must be promptly notified of any of the following spills:*

- Any uncontrolled quantity of a hazardous substance, or if assistance is needed by Fire Department or Environmental Division, or as instructed by the MSDS or supervisor's discretion:
- Oil and other petroleum products with quantity exceeding 10 gallons or area of spill greater than three feet in any direction or any amount that is spilled into a stream or body of water.
- Environmental Division review has determined the material(s) listed requires special reporting at the quantity shown: (To be supplied by environmental staff during plan review.)

- Name of spilled material; \_\_\_\_\_
- Amount spilled; \_\_\_\_\_
- Rate currently spilling; \_\_\_\_\_
- Extent of spill; including drainage features \_\_\_\_\_
- Injuries, if any; \_\_\_\_\_
- Time spill occurred; \_\_\_\_\_
- Any additional information; \_\_\_\_\_

**B. STOP OR CONTAIN THE SPILL.**

Assess the situation before attempting to contain any hazardous material spilled and proceed only if it is safe to do so. You must have knowledge of the spilled substance and don any required personal protective equipment. If necessary, make the spill scene off limits to any unauthorized personnel. If situation warrants, evacuate the area.

**C. CLEAN UP THE SPILL.**

Under no circumstances should untrained and/or ill-equipped persons attempt to perform cleanup. In some instances, spill cleanup may require respiratory protection and other personal protective equipment. If it is within the capability of the unit that caused the spill, then that unit is responsible for its cleanup. Environmental Division will make the decision to obtain assistance and coordinate with other units as required.

If you handle/work with the hazardous material as part of your job, you are to be trained and qualified to participate in the clean up of the spill.

**D. DISPOSE OF SPILLED HAZARDOUS MATERIAL.**

All spilled material and other contaminated material (soil, gravel, absorbents, etc.) must be properly disposed. It is the responsibility of the contractor that created the spill to properly package, dispose of the waste, and ensure the site is properly cleaned at no cost to the government. Some spill incidents may require cleanup, disposal, soil testing, and a site closure report by an approved licensed environmental contractor approved by Fort Campbell. Environmental Division will determine the required cleanup and disposal method.

***This plan shall be turned in to Wayne Hinson prior to storage or start of work with hazardous materials. Copy to Environmental Compliance Branch Building 2182 131/2 Street Fort Campbell, KY 42223 (Phone 798-9784)***
